

## Colorful Hair Bows or Corsets

Now we are going to work on colorful bows that you are going to make using the following supplies:

### *Supplies:*

- 1.- Metallic Dyed Dentallium (our product #85286)
- 2.- Littorina Yellow (our product #85464)
- 3.- Clear Glue (our product #12651)
- 4.- Glue Gun
- 5.- Wire Pliers
- 6.- Dyed Umbonium (our product #28997)
- 7.- 9mm Double Face Satin Ribbon or  
12mm Iridescent Ribbon  
10mm Ribbon
- 8.- Glitter
- 9.- Hair Pin

### *Steps:*

**Step #1** Using the glue gun once it is hot, make a circle with the clear glue to make the bow's center.

**Step #2** As fast as you can start putting the *metallic dyed dentallium* all around the hot circle glue and sprinkle glitter before the glue dries.

**Step #3** Now, put some more glue around the dentallium and start gluing the dyed umbonium all around it to make a flower shape. (You can glue two rows)

**Step #4** With wire pliers, cut the dentallium very short to avoid hurting somebody or yourself; at the same time it will give a beautiful look to your bow.

**Step #5** Once the flower is dry, start gluing the ribbon all around the flower on the back like shown in the picture.

**Step #6** Now, cut some strings of ribbon and glue it to the back.

As you can see, you can have a lot of different colorful bows that you can use for your hair or even make great baby shower.
